- **Enhancements and Considerations:** Dedicated to optimizing app performance, ensuring robust security measures, and enhancing web accessibility/SEO, with expertise in responsive designs.
- **Customer satisfaction:** Elevating customer satisfaction by integrating innovative functionalities that enhance product value.
- **Collaboration with cross-functional teams:** Work closely with designers to transform wireframes (Figma) into visually appealing and interactive user interfaces.
- **Data fetching and optimization:** Utilize ReactJS libraries to efficiently fetch and handle data, optimizing application performance and user experience in our web Page.

Fullstack Developer	Kappsoft System Pvt Ltd, Chennai	01 Jul 2023- 26 Dec 2023
-------------------------------------	--	--------------------------

- **Fullstack Development:** Developed and Maintained end-to-end responsive web applications using ReactJs, NodeJs, ExpressJs, Postgress SQL, HTML, and CSS Libraries.
- **Authentication and Authorization:** Implemented authentication and authorization using JWT token and ensure data security.
- **Aws S3 & CI CD:-** Implemented image uploading and storage solutions using AWS S3 buckets for efficient and secure file management and Implemeted CI CD pipelines for continuous Integration and continuous Development.

SKILLS

- ReactJs,React-Lifecycle Methods, JavaScript, ES6/ES7, RESTful APIs, CSS, CSS Libraries like Material-UI, Bootstrap.
- NodeJs, ExpressJs, ThirdParty APIs, SMS APIs, Payment gateway Integration, Email Service APIs, e-commerce flow, webhooks, and websockets.
- Data Structures, Algorithms, Postgress DB, SQL, MySQL, MongoDb, NoSQL, Git Version Control, and AGILE Methodologies and Jira Board.
- Good Programming skills, Problem Solver, Npm, and CI/CD Pipelines, Postman Tool, Git Hub, Vs Code.

PROJECTS

Visaco	Jun 2024
<ul style="list-style-type: none">• Summary: Users can easily apply for visas from the comfort of their homes without visiting an embassy or consulate. The entire process is streamlined and accessible online.• Features: Authentication, Real Time Updates with Visa Status, Notifications, Add and Remove User• Technologies:- ReactJs, NodeJs, ExpressJs, JavaScript, MongoDB, Firebase and React-native, CSS frameworks.	

- **Summary :-** Developing the Aunest project, an online platform for booking gold based on carat and gemstone preferences and also product will be delivery in home.
- **Features:-** Authentication, Real time Updates Notification for Order, SuperAdmin and Vendor Need to be Approve, FAQ
- **Technologies :-** ReactJs, JavaScript, Bootstrap,NodeJs,ExpressJs, PostgressSQL, ReactNative, Sequel APIs, 2factor APIs, Google FireBase, Brevo APIs, Smallcase APIs, Push notification.

- **Summary :-** Mind-media, a platform Booking the events in online for football and cricket, Birthday events etc.
- **Features:-** Authentication, Calendar Modules, Events Organizing
- **Technologies :-** JavaScript, ReactJs, Redux, HTML, CSS and Frameworks, RestAPIs

- **Summary :-** Developed Wyzebulb, a platform integrating two applications into a single cohesive system. Utilized webhooks and APIs for real-time updates and status tracking, ensuring seamless communication and synchronization between applications.
- **Features:-** Authentication, Third Party Application Implementation, Automated flows, FAQ
- **Technologies :-** JavaScript, NodeJs, ExpressJs,MongoDB,Third party APIs integrations.

DECLARATION

I here by declare that all the particulars furnished by me are in this application are true and complete to the best of my knowledge and belief.
